

Florenliste von Baden-Württemberg 2018

Liste der in Baden-Württemberg etablierten oder in Etablierung begriffenen Farn- und Samenpflanzen

Die Florenliste enthält die gültigen Namen der in Baden-Württemberg vorkommenden Pflanzensippen (Anzahl der Sippen: 3.090). Lediglich kultiviert oder bisher nur unbeständig vorkommende Sippen sind in dieser Liste nicht enthalten.

Sie kann in der vorliegenden Form auch als Anstreichliste bei Artenerfassungen verwendet werden.

Erläuterung der Abkürzungen

cv.	=	Kulturvarietät
hort.	=	„der Gärten“ (kennzeichnet Zierpflanzen, deren Namensgeber nicht zu ermitteln sind)
agg.	=	Aggregat
s. str.	=	im engeren Sinne
s. l.	=	im weiteren Sinne
▲	=	diese Art ist in Baden-Württemberg nur durch ihre Nominatunterart vertreten
[]	=	Aggregate, die nach Möglichkeit nicht verwendet werden sollen
(u)	=	unbeständig auftretende Arten, die für das Verständnis des taxonomischen Zusammenhangs wichtig sind oder die in den letzten Jahren häufiger aufgetreten sind.
(F)	=	Fehlangabe für Baden-Württemberg, die aber für das Verständnis des taxonomischen Zusammenhangs wichtig sind.
(?)	=	Status der Sippe noch unklar
H	=	Häufigkeit (bei Nutzung als Anstreichliste)
S	=	Status (bei Nutzung als Anstreichliste)
