

This topographic map illustrates the flood risk zones in the Geislingen area. The map is divided into three main sections, each representing a different administrative district: Gemarkung Geislingen (top left), Gemarkung Wolpertshausen (top center), and Gemarkung Tüngental (bottom right). The flood risk zones are color-coded: green for low risk, yellow for medium risk, and blue for high risk. The map also shows the course of the Geislingen river and its tributaries. A scale bar at the bottom indicates distances up to 500 meters. A north arrow is located in the top right corner.
